

The Coaching Discovery Assessment

The same diagnostic I run with every new coaching client. Fill it out honestly — the value is in what it makes you admit. Bring it to a consult, or use it solo as your annual business physical.

Ground rule: write real numbers, not aspirational ones. This document is for you. An honest 'I don't know' is more useful than a flattering guess — every 'I don't know' below is an action item.

Section 3 — The Honest Questions

If you kept selling exactly as you do now for 10 more years, what would you own at the end of it?

What's the one part of your business you'd be embarrassed to show another agent?

What did you earn per hour last year? (Net income ÷ real hours.) How do you feel about that number?

If a health issue took you off production for 90 days, what would your income be?

What are you pretending not to know about your business?

Section 4 — Where You're Going

12 months from now, success looks like (income, time, portfolio):

Section 5 — Scoring Yourself

Count your ■ checks in the healthiest column of each Section 2 question, and your 4s and 5s in Section 1. Twelve or more: you're running a business — coaching sharpens it. Six to eleven: you're earning well but building little — this is where coaching pays fastest. Five or fewer: production isn't your problem, infrastructure is — start with the Toolkit's cash-flow system this week, before any coaching conversation.

Next step, if you want it: bring this completed assessment to a free 30-minute consult at wealthbuildingbroker.com/book.html. I read it before the call; we spend the 30 minutes on your constraint, not on introductions.
